Address (City,
Street, Number):

AMA-REGISTRATION NUMBER

Postal Code, City:

Confirmation and signature of the farmer

As farmer of the above named holding I hereby confirm:

1. An area aid application for the relevant harvest year was submitted and the holding is subject to cross compliance conditions and their controls.
 2. The harvested and delivered biomass comes from areas situated in Austria, which already were in agricultural use before 1 January 2008.
 3. It does not originated from:
 - Worth protecting areas (Art. 17 of Directive 2009/28/EC), which are turned to cultivated land since 01.01.2008.
 - Areas with the status highly biodiverse grassland in the meaning of the Regulation (EU) No. 1307/2014 ¹⁾
 4. For the calculation of the greenhouse gases reduction the default values or the NUTS II values (Art. 17/19 of Directive 2009/28/EC) are used.
 5. The harvested and delivered biomass from these areas was produced in compliance with the provisions of the Austrian provinces governing nature conservations which are relevant to Directive 2009/28/EC.
- Following areas are excluded from this confirmation (plot of land, site) ²⁾:

If there is no exclusion of certain areas, so the confirmation applies to all areas of my holding.

All data from my area aid application can be processed and checked by Agrarmarkt Austria (AMA) or the Federal Ministry of Agriculture, Forestry, Environment and Water Management to ensure the compliance with Directive 2009/28/EC. I also agree, that AMA is allowed to request and to check supplementary area-related data from the appropriate authorities in the Austrian provinces, which is relevant for the compliance with the provisions governing nature conservation.

With his signature the farmer confirms, that all information he boasted are veridic and complete.

location, date

signature of the farmer

- 1) Unless in case of non-natural, namely grassland it is evidenced that the harvesting of the raw material is necessary to preserve its grassland status.
- 2) If land-use-changes since 01.01.2008 have been done, these areas have to be excluded. You have the possibility to calculate the actual greenhouse gas emission by an environmental verifier (default values or Nuts II values can not be used in this case).
